SUMMARY

Highly motivated and determined flutter developer with a passion for building high-quality Websites. Seeking a challenging and dynamic work environment where to utilize skills and experience to build innovative websites and contribute to the growth and success of the company. Eager to learn and grow as a developer and make a meaningful impact through the work.

PROJECTS

Title

EC-Shop(ECOMMERCE WEBSITE)

12/2023 - 01/2024 Location

This project was developed purely for educational purposes, and aimed at enhancing my web development skills, AWS knowledge, and Nginx hosting expertise. In the video, I demonstrate the functionality and key features of this e-commerce website

FEATURES

- **User Side:** Secure login/logout with OTP, profile management, efficient product search, seamless wallet integration with Razorpay, comprehensive order management including tracking and returns.
- **Admin Side:** Robust authentication, insightful dashboard with sales analytics, user and product management, streamlined order and coupon management, dynamic banner and offer management with image cropping functionality.
- The **Ec-Shop** project is hosted on **AWS**, utilizing Amazon EC2 for server hosting, showcasing the importance of SSL certificates to ensure data security. This demonstrates practical application of AWS services and reinforces knowledge of web hosting best practices, enhancing both web development and AWS skills.
- **STATIC WEBSITE**
- I have created a static website frontend using HTML and CSS, featuring clones of LinkedIn, Spotify, and Facebook interfaces.
